Reduce the time and cost of business processes automation with Microsoft Power Apps
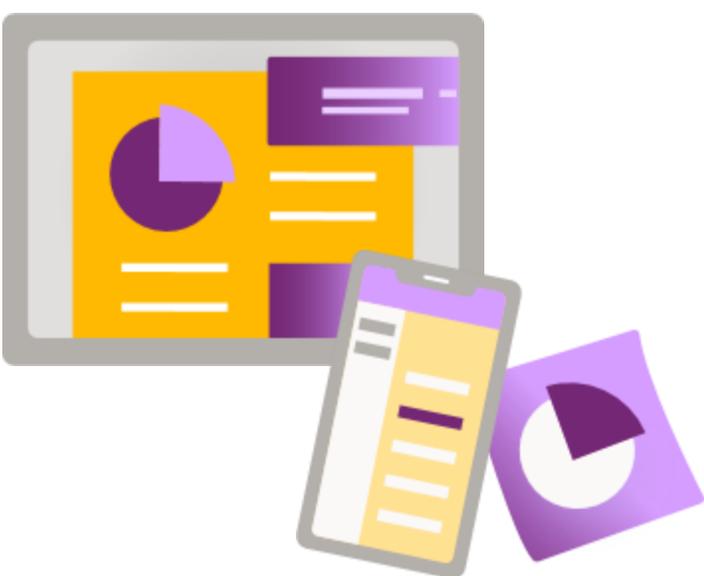

Modernization is the key to moving your business forward.
Microsoft Power Apps helps you adopt low-code as a platform to unlock innovation, so you're able to automate business processes, reduce development costs,[1] improve efficiencies, and extend the value of your investment in Microsoft 365 and Microsoft Teams. And with Power Apps, you're able to empower non-developers, both in IT and the business, to build custom, professional-grade apps that solve common business challenges and help you get to market sooner.

You need app development resilience now more than ever

86%
Surveyed organizations struggling to find technical talent to develop and maintain apps[2]

## Extend your app development potential

74%
Average savings in app development and costs in the first 3 years[1]
